**DETAILED ACTION**

***Election/Restrictions***

1. Applicant's election with traverse of Species M, figures 18-20, claims 1,6,11-21 in the reply filed on 10/10/2008 is acknowledged. The traversal is on the ground(s) that product and process claims. This is not found persuasive because this is only a Species Restriction Requirement. There was not product and process Restriction Requirement.

The requirement is still deemed proper and is therefore made FINAL.

***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Jacobs (US 5,126,648).

Regarding claim 1, Jacobs discloses a non-rotary, machine comprising a support having a load carrying surface (22, fig. 2a) and an opposite surface; an electric motor having an airgap through which lines of magnetic flux extend, and an armature coupled to said support, said armature provided with at least two electrically conductive paths (11,11', fig. 2b, col. 5, Ins.24-30 and col. 6, Ins. 17-21) each having at least one current carrying segment disposed in said airgap and substantially perpendicularly intersected by said lines of magnetic flux to produce thrust forces which act to move said armature

and thus said support in two dimensions in a plane; and, a bearing support system suspending said armature in said airgap, said bearing support system (col. 37, Ins. 37-45) disposed between said support and said armature.

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claim 11 is rejected under 35 U.S.C. 103(a) as being unpatentable over Jacobs in view of Korenaga et al. 6,037,680.

Jacobs discloses the oscillatory device but does not disclose having the device return to a known position when the power is turned off.

Korenaga et al. teaches a control system where the device returns to a initial state in column 11 lines 16-17.

Since Korenaga et al. and Jacobs are from the same field of endeavor.

It would have been obvious at the time the invention was made for one of ordinary skill in the art to have utilized an initial position for the device in order to simplify the control system. With an initialing control system, there is no need for the device to determine the location of the device each time the power is turned on.

***Allowable Subject Matter***

6. Claims 6,12-21 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See PTO-892.
